#### FIRE CAUSES \$1500 LOSS AT CHEVROLET GARAGE

Fire that started from a short circuit in wiring in the basement of the Alfred Hanson garage caused no little excitement early Thursday evening. The short in the wiring was directly underneath the tire repair room and adjacent to the storage room where tires in stock are kept. Many of these were burned and this is what made the dense black evervwhere.

Members of the City Fire dekent the smoke from bursting into flames, that would have resulted in a very disastrous conflagration.

The damage was estimated at about \$1500.00.

## 'Come To Louisiana, We'll Come To Mich.

MICHIGAN-LOUISIANA ARE UNDER-SOLD

Visiting this section of Michgan for the first time, Colonel Robert H. Brothers of New Orleans, Louisiana, was a guest in Grayling Wednesday of Messrs C. J. McNamara, O. P. Schumann and Clarence B. Johnson, who conducted Colonel Brothers and his party on a sightseeing tour of Grayling and vicinity.

Most interesting to the visitor from Dixie was the winter sports project which is being undertak-en here, and he loudly praised northern Michigan's climate, beautiful lakes and natural wood-

"I have never viewed such a natural paradise anywhere in America," he stated. "With no intentions to say a word disparaging about Florida or California, I must admit, after seeing your country, that their claims are exaggerated, and yours are underestimated.

"In Louisiana we have the Evangeline country immortalized by Henry W. Longfellow in his famous poem. There her mortal remains rest, and the beauties of the Tesch country we hope to have Michigan people see in your winter time when we have sunshine and flowers. Longfellow also immortalized north Michigan in his poem Hiawatha.

"As a reciprocal plan we in Louisiana will invite our people to visit cool and green Michigan in summer. This was a project once started between your late Governor Fitzgerald and the late Senator Huey P. Long. Now that Huey's brother Earl K. Long has succeeded to the governor's chair, we expect to consummate this The trip was made in tourist aid program between the two states.

Accompanying Colonel Brothers were Colonel G. H. Maines, Washington newspaper man and public relations advisor, and his son Charles D. Maines of Flint.

Meaning of Wet. Dry Bulb

The United States Weather bu-reau says: "When we speak of the temperature of the air, the dry bulb temperature is referred to; in other words, the dry bulb is the ordinary thermometer. By the wet bulb temperature is meant the temperature as shown by a thermometer. the bulb of which has been covered with a piece of muslin wet with water and from which the water has been permitted to evaporate at a rapid rate so that the lowest temperature is registered. That is, the evaporating water couls the bulb of the thermometer. With these two temperature readings and with the aid of a set of tables called psychrometric tables, the relative humidity and the temperature of the dewpoint are computed. Relative humidities and dewpoint temperatures have wide application in various fields.'

"In 1938 almost exactly onehundred million dollars, was ly collected for and turned over to countres, school districts, cities and townships to be spent by local officials for purposes which formerly were supported entire-ly from taxes spread locally by state in which the state treasurlocal officials or for new purposes conceived since the state at large became a Santa Claus.

"New school aids provided since 1933 consume more than \$25.000,000 a year. Demands of county and city relief commissions, always before 1933 supported from local taxes alone, each year absorb nearly \$40,000,-000 of state cash. Another \$30,-000,000 goes direct and immediately into county road coffers.

State Increase Slight

"So when one deducts this \$65,000.000 of new grants-in-aid set\_up\_since 1933, plus increased aid to county road commissions since 1932, it is discovered that the actual increase in those functions of state government which existed back in 1933 costs but slightly more than then-

They cut expenses, or faced disaster. The careful business man who faced that condition either stimulated his business income or cut

his expenses to what he took in--"The state has not done that Faced with a suddenly reduced state income when the strikes aimed their deadly blows at business back in 1937, the state took on new and added obligations and spent more than ever. The legislature blithly appropriated an extra \$10,000,000 for relief when its coffers were already empty. That was merely legalizing embezzlement because in order to pay the bills, trust funds were used.

"And that leads up to the next

step in our study. 'Michigans constitution is very rigid in certain respects. It provides that receipts from certain specific taxes must be applied to certain specific purposes. For instance, railroad, telephone, utility and similar taxes go into the primary school interest fund to be divided between the school districts strictly in accordance with constitutional mandate. Motor vehicle and gasoline taxes are very definitely earmarked for road maintenance and improvement and cannot be expended otherwise. They should not be even borrowed for general fund expenditures, but unfortunately they are.

Borrowing from Peter "The last sentence in the fore-going paragraph shows how the stew, anyway you look at it. The state can get so far in the red auditor general's statement fully and still pay. The state merely emphasizes the difficult task with puts these trust fund revenues temporarily in its general fund fronted.

> "But there finally comes a time in state management just as it will in private venture when this practice leads to grief. It has happened in Michigan.

> "Last January the general fund deficit stood in excess of \$10,-000,000. Expenses and demands upon the state since that day have each and every day exceeded daily receipts available for general fund purposes. On the last day of this present month of 1939, the general fund deficit will exceed \$31,000,000. This condition is unavoidable and inescapable.

"The state can do this because its total trust fund balances exceed this sum. Red ink is offset

Not All Funds in Cash

The auditor general naturally inquired of the treasurer how his liquid cash stood The auditor general found that there was only \$3,400,000 cash er carries his deposits.

How It Happened

"The books of the auditor general showed that checks totaling more than \$2,000,000 had already been sent out but had not yet been presented to the treasury for payment. You know—outstanding warrants. Payrolls for the half-month were in prepara-These-payrolls for nearly 17,000 state employees call for another million. That left less han half a million cash on hand.

"The auditor general already had held up nearly a million in refunds to cities and townships due them under the liquor control act. He also held about \$650,000 of overdue bills for hospital and this gun is fastened to the end of a surgical services rendered under the afflicted and crippled child-against the sidewalk. Manufacturren acts, awaiting the signing of ers are developing more and more a deficiency bill passed by the legislature. He knew these hospitals were in desperate need of the money. He knew that every certainly must be paid. He knows that county welfare units must ceived up to and including Frihave state cash to meet the requirements of those in need. He knows that nearly 40,000 inmates or reject any or all bids. of state institutions—penal, charitable, mental and corrective -must be fed, housed, clothed and guarded.

"So this is how a state goes broke."

What Is to be Done?

In the judgment of the state auditor general, Michigan has "two ways to crawl out of the hole.

1. Have the legislature balance the budget. This means denial of demands from "pressure groups" for spending of state funds in excess of reasonable revenue expectations.

2. "Then at some time revenues of the state might increase and the red ink items might be wiped off. Failing in this, the people, with the current budget balanced, might some day forget and forgive and authorize the issuance of time bonds to retire the old debts.

As for new taxes, legislators will probably hesitate a long time before resorting to this unpopular step. A bond issue, Mr. Brown also feels, would face certain defeat in a state referendum.

The legislature, meeting today (June 29) for final adjournment, has a "pretty kettle of fish" to which legislators today are con-

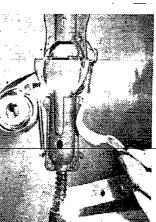

bration. But the danger has been removed. No longer need you worry when Junior and Sis decide to rouse the neighborhood. New mechanical noisemakers have been designed to replace exploding firecrackers and miniature bombs.

The pained expression on this young lady's face is not due to fright The sparkler gun which she holds is guaranteed safe. It shoots out sparks, but they will not cause fire.

#### SWIMMER'S ITCH

With the advent of the resort season, there are certain to be reported from many lake and river beaches numerous cases of "schistosma dermatitis", or 'swimmer's itch," the source of July 1, 1939, upon the tax rolls which was a puzzle until traced of the City and assess the same by Dr. George R. LaRue, University of Michigan zoologist, to a tiny, wormlike parasite of the Lesh-water snail.

In its free-swimming larval stage, the parasite escapes from the snail and looks about for a warm-blooded animal in which to complete its development. It is no respector of persons, being quite as likely to pick a sedate clergyman for its attentions as to choose tha fairest of bathing beauties.
